Story takes place in: Hawaii, USA
Type of book: Non-fiction / personal finance self-help book

Characters

Rich Dad → thinks rich
Poor Dad → thinks normal/(poor)
Robert → learns
Mike → friend

Rating: ★★★★★

Summary

Rich Dad Poor Dad is about Robert Kiyosaki's childhood and his ideas about money. He had two father figures: his real father, who is called poor dad, and his friend's father, who is called rich dad. Poor dad believed in school and a safe job, while rich dad believed in financial education and investing. Robert learned that assets make money and liabilities cost money. He also learned that rich people make money work for them instead of working for money. The book shows that many people work hard but still do not become rich. It explains that financial education is very important. It also teaches that thinking differently about money can change your future. In the end, the book encourages people to become financially independent.

TASK1**Date: January 31st, 2026****Diary Entry – Chapter 1****Time: 9:00 am**

In this chapter, I read the first pages of the story. I found it very interesting that Robert wants to become rich at such a young age. This made me think about my own future and what I want to achieve in life. I really like the idea that Rich Dad will teach him important lessons about money. I already feel that Rich Dad's way of thinking is better. I am curious to see how Robert will change.

Date: February 6th, 2026**Diary Entry – Chapter 2****Time: 11:00 am**

In this chapter, I learned about the different opinions of Rich Dad and Poor Dad about school. What I found interesting is that they have completely different ways of thinking. Rich Dad believes that school does not teach enough about money, while Poor Dad thinks good grades are the most important thing. I strongly agree with Rich Dad because many things we learn in school are not useful later in life. This made me reflect on my own education and future goals.

Date: February 7th, 2026**Diary Entry – Chapter 3****Time: 1:00 pm**

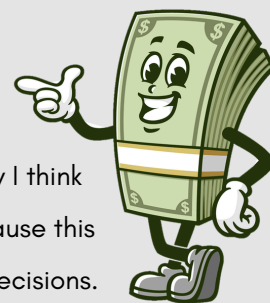

In this chapter, I read about Robert and Mike going to Rich Dad's office. I was surprised that they had to wait so long just to talk to him. This shows that Rich Dad is very busy and important. When he offered them a job for only ten cents, I thought it was very little money at first. However, I believe he has a good reason for this. In my opinion, he wants to teach them something more valuable than money.

Date: February 14th, 2026**Diary Entry – Chapter 4****Time: 11:50 am**

In this chapter, I read about the job that Robert and Mike started. At first, it seemed unfair that they worked for so little money. However, I realized that Rich Dad wanted to teach them an important lesson. I think his method is very smart and different from normal teaching. They later used comics to make money, which shows creativity and intelligence. I agree with his way of teaching because it helps them become more independent.

Date: February 26th, 2026**Diary Entry – Chapter 5****Time: 5:00 pm**

In this chapter, I learned about assets and liabilities. I found this very important because it changed the way I think about money. Assets make money, while liabilities take money away. I completely agree with Rich Dad because this knowledge is essential for financial success. Many people do not understand this and make bad financial decisions. This made me think about how I will manage my money in the future.

Date: February 28th, 2026**Diary Entry – Chapter 6****Time: 9:00 am**

In this chapter, I read about fear and emotions. I strongly agree with Rich Dad because fear stops many people from becoming successful. Many people are afraid to invest or try new things, which holds them back in life. In my opinion, controlling fear is very important if you want to achieve your goals. This part made me reflect on my own fears and how I can overcome them.

Date: March 6th, 2026**Diary Entry – Chapter 7****Time: 12:00 pm**

In this chapter, I learned about taxes and different types of income. I think it is very important to understand how money and taxes work. I found it interesting that some people can use their money longer before paying taxes, which gives them an advantage. This knowledge is very useful for making better financial decisions. It also made me realize that financial education should be taught more in school.

Date: March 7th, 2026**Diary Entry – Chapter 8****Time: 9:00 am**

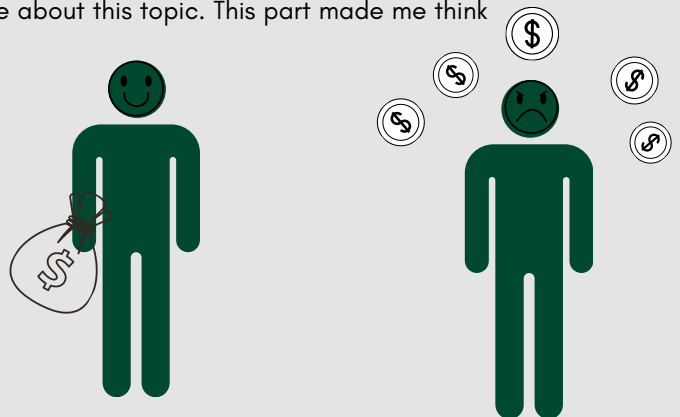

In this chapter, I read about companies and why rich people own them. I strongly agree with Rich Dad because owning a company gives you more opportunities and freedom. Working for someone else is not always the best option if you want to be independent. This part made me think about my future career. I would like to start my own business one day and be successful.

Date: March 9th, 2026**Diary Entry – Chapter 9****Time: 6:00 pm**

In this chapter, I learned that having a lot of money does not automatically make you rich. I agree with Rich Dad because knowledge about money is more important than money itself. People who do not understand money can lose it quickly. In my opinion, this is very true in real life. This part changed the way I think about wealth and success.

Date: March 11th, 2026**Diary Entry – Chapter 10****Time: 8:00 am**

In this chapter, I read about the importance of understanding money. I completely agree with Rich Dad because this is one of the most important lessons in the story. Many people work very hard but still have financial problems because they do not understand money. I think schools should teach more about this topic. This part made me think about my future and how I want to handle money.

Dear Mike,

I wanted to write to you because reading Rich Dad Poor Dad made me think about you and your future. Do you think you will become rich or stay poor? I'm really curious about that.

Also, do you actually follow the six lessons from your father? Some of them sound easy, but I think they are hard to apply in real life.

I found it interesting that money should work for you instead of you working for money. Do you already try to follow this idea, or is it still difficult? Your story made me think about my own future as well.

Best regards,
Abdullah Talas

Dear Rich Dad,

I wanted to write to you because reading Rich Dad Poor Dad made me think a lot about your ideas and lessons. I find your way of thinking very interesting, especially how you see money and education.

Do you think it is really possible for everyone to become rich if they follow your principles? Some of your lessons sound simple, but I believe they are difficult to apply in real life. For example, the idea that money should work for you instead of you working for money is very powerful, but not easy to achieve.

I also wonder if people ~~today still follow your adv~~ or if they prefer the traditional way of working and earning money. Your teachings made me reflect on my own future and how I want to manage my money.

Best regards,

Abdullah Talas
